PRESS RELEASE

Joe Page Bridge in Hardin

Location – Joe Page Bridge carrying IL 16/100 across the Illinois River in Hardin

The Illinois Department of Transportation today announced that the Joe Page Bridge carrying IL 16/100 over the Illinois River will be restricted to one lane beginning on Monday, April 3, 2017. Temporary traffic signals will be installed to maintain two-way traffic through this area. This work is required to perform maintenance and paint the existing bridge and is expected to be completed by the end of September 2017.

Long delays are expected. This will be especially true when the bridge is raised for river traffic. The Department recommends using alternate routes as much as possible during this time frame. The Department advises the traveling public to be patient, follow all construction signs and drive with caution through the work zones.

The General Contractor on this project is Keeley & Sons, Inc., of East St. Louis, Illinois. Mr. John Adcock is the Supervising Field Engineer for the Illinois Department of Transportation. If you have any questions concerning this project, you may contact him at (618) 346-3352.
